Welcome to titana

Titana is the creation of professionals with a special path in the field of food that unites them with the common vision of promoting the most exceptional products of the Greek land.

food trading
& consulting

Food products

The creation of the corporate scheme was based on the previous experience of the contributors in the field of selling consumer goods as well as the love that one can have for products produced from the Greek land and the desire of each of us to help in their distribution and consumption throughout the world.

At the same time, we noticed the great difficulties faced by the Greek export activity due to the bad mentality and the lack of cooperation that prevailed in the previous decades. Also from the management of the resource deficit provided as aid, the lack of vision and business practices.

So, we thought
of starting
our effort,

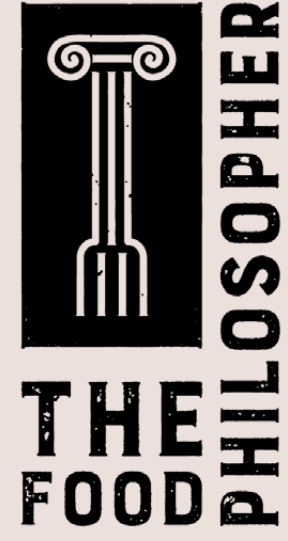

in collaboration with young entrepreneurs – producers who understand that their product must have approved specifications, stability in the quality of the product produced, proper packaging, appropriate communication policy with potential customers and consistency in agreements.

We believe that we have achieved the most appropriate combination of quality and price in a highly competitive environment, covering the needs of those looking for resale on store shelves, but also those who are interested in supplying restaurants and hotels with Greek Mediterranean food products.
